MASTER LIST OF CALIBRATION INSTRUMENTS

F/QC/08 (01 / 01.12.2021)

Note : List of calibration instruments are those which impact the process conformity as well as product conformity. These instruments are either installed on production equipments, utility equipments, QC testing equipments. Calibration / Verification can be done by internal method (Weighing scale, Measure tape, Measuring scale, pH meter, TDS meter etc.) & External laboratories including Legal metrology for Weighing scale by weight & measure department. This list shall be updated as & when any existing instrument is calibrated / verified by external calibration agency, which may result in failure of calibration status or acceptance of calibration results. This list shall also be updated as & when any instrument is purchased. Responsibility for acceptance of calibration results lies with user department only. User department shall ensure to get their instrument calibrated / verified prior to due date of calibration / verification.

Sr. No.	Name of Instrument	Instrument ID No.	Make	Purpose of Instrument	Location of use	Instrument - Range	Least count	Accuracy / Acceptable Error	Method of Calibration - Internal / External	Frequency of Calibration	Date of Initial Calibration	Current Calibration date	Next due date of calibration	Calibration agency	Calibration report number	Remarks
